

Completion of Office Refurbishment project for King's College London

We have recently completed the refurbishment of the 8th floor offices of Melbourne House, part of the King's College London campus.

Haines Phillips Architects was appointed by Quinn London Limited in February 2019 to prepare detailed production information for the project which involved the partial strip out of the existing office layout, and the installation of a new arrangement of offices, meeting rooms and ancillary areas to house the Principal and Vice Principals of King's College.

Further details on the project can be viewed on the project page [here](#).
